

CHALLENGE

Making the DC attractive to tenants

Controlling rising energy costs

Managing unpredictable load growth

SOLUTION

- Presenting off grid opportunities e.g. gas plant
 - Bespoke buying for anchor tenants
- Targeted Renewables: on site, private wire or PPA

- Dynamic purchasing to maximise price benefit
- How and when to fix increasing non-energy costs
- Credit negotiations to remove security deposits

- Eliminating volume risk contractually
- Managing growth through trading strategy
- Site by site 3 year price/cost forecasting

NOVEUS

MINIMISING RISK | MAXIMISING VALUE

New Data Centres – Why Noveus?

A safe pair of hands to get the power you need and delivered on time in the most cost effective way

CHALLENGE

Understanding the connection options

Control of connection costs

Deliver the connection on time

SOLUTION

- Undertake a network analysis
- Provide a cost analysis - capex/opex
- Recommendation of best option

- Secure capacity at minimal cost
- Competitive procurement of the works and ownership of the connection
- Negotiate load take up profile and availability charges

- Secure the works under recognised industry contracts
- Project management and contract administration
